Student Development Programme: Discipline, Hygiene, Code of Conduct & Social Media Awareness

To promote responsible behaviour, healthy living, and ethical conduct among students, the Department of Commerce organised a Student Development Programme on Discipline, Hygiene, Code of Conduct, and Social Media Awareness for the students of I PUC Commerce and II PUC Commerce.

The programme was conducted with the active involvement of all Commerce faculty members in collaboration with the Department of Physical Education. The sessions were organized separately for boys and girls to address gender-specific concerns and provide relevant guidance in a comfortable and interactive environment.

The Keynote Speakers emphasized the importance of maintaining discipline on and off the campus, following the college code of conduct, practising good personal health and hygiene, and using social media responsibly. Students were also guided on developing positive habits, respecting institutional values, maintaining healthy relationships, and becoming responsible digital citizens. The programme witnessed enthusiastic participation from all the students. The interactive sessions enabled students to clarify their doubts and gain practical insights into responsible behaviour and decision-making. The key speakers delivered informative and engaging sessions, offering practical suggestions and tailored guidance that addressed the needs of the students effectively.

The programme concluded on a positive note, reinforcing the institution's commitment to nurturing disciplined, responsible, and socially aware individuals who uphold the values of the college and contribute positively to society.

Time Management

The Secret Behind Every Successful CA Student

"You don't need more time. You need better priorities."

Every Commerce student dreams of becoming a Chartered Accountant. It is one of the most respected and rewarding professions.

However, many students often say:

"College assignments, tests, practicals, and CA classes... it's impossible to manage everything!"

The truth is, CA is not about studying all the time—it is about studying smartly and consistently.

Why Do Students Feel Overwhelmed?

The biggest challenge is not the syllabus but poor planning.

Many students delay their work, spend hours on mobile phones, study only before exams, skip revision, and lose confidence when topics become difficult.

Remember time is the only resource equally available to every student. Successful students simply use it better.

Instead of trying to study for long hours after returning home, revise class notes for 30–45 minutes.

Highlight important concepts and prepare for the next day's classes; get proper sleep.

Sunday- Your Success Day!

Complete weekly revision, solve mock tests, clear pending doubts, plan the upcoming week. A well-utilised Sunday can save several hours during the week.

The 5-Hour Rule

Every day, dedicate three focused hours outside college.

2 Hour – College subjects, 1 Hour – CA concepts, 2 Hour – Revision & Practice Questions. Small daily efforts create extraordinary results.

The Power of Daily Revision

Never wait for exams to begin revision, Review today's learning today, A topic revised: Once today, Again after two days, Once on Sunday, will stay in your memory much longer.

Avoid Time Killers

Be honest with yourself. Reduce endless scrolling on social media, excessive chatting, unplanned outings, procrastination.

Last-minute studying.

Even saving one hour daily gives you over 365 extra study hours in a year—the equivalent of many weeks of focused preparation.

Time Management

Success Habits of CA Toppers

- They attend every class with full concentration.
- Ask doubts immediately.
- Revise daily.
- Solve practice questions consistently.
- Maintain discipline even when they don't feel motivated.
- Success is built by habits, not by occasional hard work.

Your Daily Success Formula

- Attend every lecture attentively.
- Revise the same day.
- Practice MCQs and numerical problems.
- Sleep 7–8 hours.
- Exercise or walk for 20 minutes.
- Keep your mobile away during study time.
- Plan tomorrow before going to bed.

Remember, CA is not a race of intelligence. It is a marathon of discipline, consistency, patience, and time management. Thousands of students have successfully balanced college and CA preparation before you. You can do it too. Every chapter completed today is one step closer to your dream.

Manage your time today, and tomorrow you will manage your career with confidence.

"Dream Big. Plan Well. Stay Consistent. Every disciplined day brings you one step closer to becoming a Chartered Accountant."

The Forgetting Curve: Why We Forget and How to Remember

The Forgetting Curve is a concept developed by German psychologist Hermann Ebbinghaus. It explains that people forget newly learned information very quickly if it is not reviewed. Studies show that within the first 24 hours, we can forget a significant portion of what we have learned. However, regular revision strengthens memory and helps retain information for a longer time.

The best way to overcome the Forgetting Curve is through spaced repetition—reviewing the same topic at increasing intervals. For example, revise immediately after learning, then after 1 day, 3 days, 7 days, 15 days, and 30 days. Active recall, solving practice questions, teaching others, and making concise notes also improve long-term retention.

For students preparing for examinations, learning once is never enough. Revision is the key to mastery. The more frequently and actively you revisit a concept, the stronger it becomes in your memory.

Remember: "Don't study until you remember; study until you can't forget."
